

Teaming up with Firestopping Contractors to provide safe and quality project installations

We understand that our customers specialising in firestopping are devoted to professional installation and do not compromise on quality. They take responsibility for the quality and compliance of their work on each and every project they are involved in.

Our aim is to support firestopping contractors in this approach by building long term relationships with them and providing them with the best quality products and associated services.

ONE STOP SOLUTION

Our QuelStop Firestopping System is suitable for use with most common service penetrations as well as some of the more uncommon or unusual ones. The high quality individual products are manufactured in the UK and have undergone rigorous testing as a complete system enabling you to source all your firestopping requirements directly from a single, trusted supplier. The core system is also compatible to use with other Quelfire products, such as fire collars and fire sleeves.

EXPERT TECHNICAL SUPPORT

We have been working with firestopping contractors for over 40 years, supporting them in the quality and compliant installation of firestopping solutions.

Our experienced and friendly technical support team is dedicated to provide advice on product details, installation and applications, including those that are unusual or not widely used. We are also ready to do site visits upon request.

SHORT LEAD TIMES & SPEEDY DELIVERY

Quelfire holds large stocks of most products and can generally despatch goods the same day for a delivery the next day, either directly to site, to your offices or another contractor's premises.

EXCELLENT CUSTOMER SERVICE

We pride ourselves in providing an excellent customer service. Whether it is last minute order you need to place or ensuring you get the best value for your money, our team is always ready to go the extra mile.

EDUCATION

We are available to deliver product training to ensure you are aware of the features and benefits of our solutions so that you can choose the right system for each application.

We also offer generic training on effective passive fire protection for gaps and penetrations in buildings.

Quelfire is a well trusted brand that's renowned for its long-standing commitment to high-quality, certified products. The Quelfire systems have been tested to the latest BS & EN standards, and a range of our products also carry CE Mark Certification. Our products have been installed on thousands of projects throughout the world, including many; hotels, apartments, care homes, offices.

The company is committed to investing, developing, testing, extending the scope of application for its wide range of passive fire protection products. A significant proportion of the company's annual investment goes into developing new products or systems that push the benchmark for passive fire safety in buildings.

QUALITY FIRESTOPPING SOLUTIONS

Our core products have undergone rigorous testing as a complete system, which means you can avoid having to source different products from multiple suppliers.

Our Quelfire Firestopping System brings together a number of new and existing products, including Quelfire Fire Batt, Quelfire CE Marked Intumescent Acrylic Sealant, QF2 Fire Protection Compound, Quelfire HPE Intumescent Graphite Sealant and Quelfire Continuous Intuwrap.

The system is also compatible with our other products, such as fire collars and fire sleeves.
